DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Tuesday, 10 October 2023 at 05:21 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Air pollution levels are likely to be mostly Low on Tuesday, but parts of England and Wales may see some Moderate levels. This is due to long range transport of Saharan dust being brought down to the surface. There is a high level of uncertainty regarding this process, which means confidence is low in the extent of any increased levels of pollution.

Tomorrow: Air pollution levels are likely to remain mostly Low, but with a risk of Moderate to High levels, mainly in southern England. The uncertainties mentioned above still apply.

Outlook: Low levels of air pollution are expected through to Saturday, with higher confidence compared to previous days.
